18 Months	2 lbs.	2 1/2 lbs.	3 lbs.	3 1/2 lbs.	4 lbs.	4 1/2 lbs.	5 lbs.	5 1/2 lbs.	6 lbs.

The left column of the table gives the age of the puppy in weeks. To determine its expected weight when fully grown, weigh the puppy in ounces, look along the line of figures against the number of weeks of its age and take the figure nearest to the present weight of the puppy. The expected adult weight of the puppy will be that given at the foot of the column in which the figure nearest to its weight occurs.

The Chihuahua Weight Chart is ©Colonel V. D'Oyly Harmar. The Chihuahua Weight Chart was extracted from a book titled "The Complete Chihuahua Encyclopedia" by Hilary Harmar, which was published in 1972 by the Arco Publishing Company, Inc., New York, NY. The book is no longer in print and the publisher is no longer in business. If you present this chart on your website please leave the credits regarding the author and publisher intact. Thank you.
